

PASSION THROUGH THE YEARS

Since 1897, the year Browning produced its first gun, millions - even tens of millions - of shotguns and rifles for game and target shooting have been invented, developed and manufactured by Browning.

The inventor of the semi-automatic shotgun, Over and Under shotgun and, semi-automatic rifle, and most recently, an Over and Under gun with the lowest action frame and fastest firing system on the market.

Everyday, throughout the world, Browning guns, old or new, smoothbore or rifled, perform on the range or for hunting, providing great pleasure for their owners.

Target shooters, hunters, and collectors can find in these fascinating items a pleasure that is renewed endlessly.

Using this catalogue, it is our hope that you too will come and join the John Moses Browning family.

John Moses Browning was born on 23 January 1855, in Ogden, 35 miles north of Salt Lake City (Utah, USA), between the Great Salt Lake and the Wasatch-Cache National Forest.

Gun-making ran in the family of the young John Moses, as his father was a gunsmith who had already been responsible for a number of innovations in the field. As a young boy, he spent time in his father's workshop, and knew the name of every part of a gun before he could read.

From the age of 6, he made fishing accessories from scraps of metal which he hammered into shape on a child-sized work bench made from a wooden crate. His 19th-Century American boyhood abounds with anecdotes, all of which point towards him becoming an internationally renowned genius inventor.

It didn't take long for those who had observed his creative traits to make up their minds: at the age of just 23, John Moses lodged his first patent, for the "John Moses Browning Single Shot Rifle". This invention simplified the percussion mechanism, making it more durable and reliable.

Shortly before his death, his father handed over his business to John Moses. With his brother Matt, even with less than one thousand dollars in the bank and no experience of machine-tool operation, young Browning transformed the humble store into a small gun making workshop with seven employees.

The remoteness of their store, the low number of ready customers, and the lack of capital meant that the business struggled to survive until luck intervened to make the inventor's talents known to a connoisseur: a representative from Winchester.

In another state in the US, this representative had come across a gun made by the Browning brothers. Firmly convinced of the interest of their conception, he bought it from its owner and sent it to his superiors in the company's

head office. So impressed were they that the managing director of Winchester himself set out straight away on a six-day journey to what, at that time, was still the Wild West - the real Wild West, to meet the Browning brothers.

Despite his astonishment at finding two young men in their twenties in a rustic workshop, the man was perceptive enough not to be fooled by appearances and signed commercial deals with them as soon as he could. The decision was a wise one: these agreements would last for several decades.

Browning had a future. Over the years, Browning granted licenses to several manufacturers for dozens of inventions and firearms. He invented almost everything in the field of firearms. The creativity and level of perfection of his inventions were so significant that the vast majority of his technological innovations could not be improved upon or replaced for several years.

The world of firearms is like the art world: the success of creators depends on the interest of well-informed amateurs. In 1897, it was one of the directors of the Fabrique Nationale (National

Weapons Factory) at Herstal in Belgium, who noticed a 7.65 Browning pistol incorporating a new locking mechanism. He saw the appeal straight away and the NWF obtained the manufacturing license.

Thus began an uninterrupted period of collaboration between the inventor from the Great Salt Lake and the factory on the banks of the Meuse River.

Browning reached the pinnacle of its craft with the Auto-5 semiautomatic shotgun, which was a tremendous commercial success and prompted John Moses' first visit to the Herstal workshops.

But his world-wide acclaim is without doubt due to the 9 mm Hi-Power semi-automatic pistol. More than 10 million of these legendary pistols have been sold. Starting in 1907, it was adopted by most police and armed forces across the world. The fact that the generic name for this type of gun is "Browning" demonstrates the universal acclaim and recognition it has received.

Browning's success is not at all the result of chance.

Like all American pioneers of that time, he turned luck to his advantage only through an enormous amount of hard work. His strength of character and the steadfastness of his principles were out of the ordinary.

Thus it was that, towards the end of his life, when offered an honorary title by a university, he refused it for the simple reason that "he had made it a rule never to accept anything that he had not earned as a result of his own work."

In 1925, John Moses Browning put the finishing touches on the prototype of an Over and Under which would change the history of the hunting shotgun. He called it simply B25, for "Browning 1925".

He died of a heart attack while working in his office in Herstal on 26 November 1926. It was his 61st visit to Belgium.

His body was repatriated to the United States, where he was buried with full military honours. His son Val continued his collaboration with the Belgian factory without interruption.

That collaboration continues to this very day.

Description of new products

Before they are put on the market, Browning's guns have to undergo various extremely rigorous tests. These are B.A.C.O. (Browning Arms Company) internal tests.

None of its products will be approved unless it clearly meets the following 6 requirements.

In addition, we carry out a systematic inspection process of all mass-produced guns, which involves a great many checks to ensure that every gun sold meets Browning's criteria with regard to quality, performance and reliability.

Tests B.A.C.O. BROWNING ARMS COMPANY

1 Tests of functioning and endurance

The purpose of these highly-demanding tests, which are conducted on both shotguns and rifles, is to ensure they operate correctly whatever types of cartridges are used. Thousands of cartridges are therefore fired to ensure the guns' reliability; no broken or excessively worn parts are tolerated during this test. If such faults are found, they are returned on a systematic basis to Research and Development.

2 Tests in extreme conditions

When developing a new product, the purpose of this test is to try out the guns in the worst possible weather conditions, using polar temperatures of -30° C and very high temperatures of up to $+50^{\circ}$ C. The gun has to operate perfectly at these temperatures, using a wide range of cartridges. You can therefore use our guns in the most testing conditions, in all circumstances and with complete confidence.

3 "Torture tests"

When a new product is being developed, it undergoes a wide variety of tests, which are generally more demanding than applicable C.I.P. norms, including a set of "torture tests". A set of guns are subjected to excessive pressure tests and obstruction tests to ensure the strength and reliability of our guns. In addition, we conduct safety tests, which consist of dropping the gun onto its different sides to check its reliability and safety. The legendary strength and reliability of Browning's guns is largely due to their completing all these tests successfully.

4 Gun checks

When they are manufactured, every gun is subject to a very wide variety of visual inspections and measurements, and has to meet the requirements of the specifications in every respect.

5 Gun tests

All guns manufactured are fired to ensure their precision and that they are operating properly.

6 Accuracy tests

We check the precision of every gun which emerges from our workshops. For shotguns, we check the quality of the shot patterns as well as the proper convergence of the barrels at 35 metres. For rifles, we check the precision and pattern of every gun.

Oustom Shop

The legendary B25, an exceptional custom-made gun

Entirely made in the Fabrique Nationale d'Herstal in Belgium, Custom Shop arms are born in the hands of exceptional craftsmen.

These unique models are meticulously made in order to attain perfection at every stage in their construction.

The finest assembly techniques, the beauty of detail and the love of firearms make these collections unique works of art of exceptional luxury.

Passion and craftmanship since 1897

B25 Special Flowers

The B25 over and under gun is the result of the encounter between John Moses Browning's creative genius and Liège's skills in arms-making enhanced by four centuries of tradition.

The B25 is an exceptional firearm, representing the utmost rigour in the search for perfection, and today it is the most refined and most admired over-and-under gun in the world.

Imagine a custom-built gun just made for you ...

The feeling of owning your own Browning gun is similar to that of owning a work of art. We can work on this project together and leave it to our craftsmen to produce your ideal gun.

Together with your gunsmith, the Custom Shop team will do their utmost to satisfy the most creative of your ideas, from the type of wood to the most unusual engravings you might choose.

Our range comprises four grades, each of which has a certain number of options. As they are entirely produced in our workshops, with a multitude of options available.

Let's create your ideal gun together...

The Custom Shop team working with our trained gunsmiths and your gunshop will look at your ideas and requests providing you with a full specification, quotation and delivery schedule for your own Browning B25.

The list of stock arms can be found on-line on our Internet site under the heading "Custom Shop". You will find descriptive data of the arms available, and perhaps even a source of inspiration for creating your own unique Browning B25.

The legendary strength is now combined with revolutionary design and features

"LEGENDARY RELIABILITY" AND "INNOVATION" ARE THE B725'S WATCHWORDS.

The new Browning B725 is an aesthetic and technical revolution in Over and Under shotguns.

Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

New Inflex II butt plate

New high-performance mechanical trigger system

Discover the Sporter version of the B725 on page 70

The legendary strength is now combined with revolutionary design and features

Low action frame

The new B725 has a low action frame, which combines all the qualities of reliability and long-life possessed by all Browning Over and Under shotguns. The action frame has a lower and more compact profile than most other Over and Under shotguns.

The low action frame provides the following benefits when shooting by:

- Enabling faster aiming and therefore more instinctive shooting.Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.
- The B725 is the only Over and Under gun that combines the reliability and legendary sturdiness of Browning Over and Under guns, thanks to its wide, flat bolt, a unique hinge pin and wide recoil surfaces, all combined with a low action frame.

UNIQUE TO BROWNING

INVECTOR DS"

Invector DS chokes

The new Invector DS chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80 mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

See the full range of Invector DS chokes on page 87.

Extensive shooting of 500 rounds

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

INVECTORDS™ COMPETITOR'S CHOKE

Z

I

The B725 has new barrels made of new Back-bored Vector Pro shaped barrels and Invector DS chokes. This gives the B725 perfect balance, ergonomics and swing in all shooting conditions.

The principle of the Back-bored Vector Pro barrel is to improve the diameter of the bore of the barrel and to extend the forcing cone wich provides three advantages:

- Increased speed and better penetration of shot by reducing friction between the shot and the walls of the barrel
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced because the shot load moves more freely.

Mechanical firing

The B725 has an improved mechanical firing system, allowing the shooter to really "feel" the shot as the trigger is pulled, which makes for a great feel.

These new firing system is shorter, faster and lighter giving more control over your shooting.

Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

Even if you only have one cartridge in your gun, you will still be able to fire, which is not the case with an inertial system.

Inflex II recoil pad

A totally new Inflex II recoil pad is fitted on all B725 shotguns as standard.

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun.

This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available on option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own morphology and also adapt it depending on the hunting season.

Furthermore, these exclusively designed pads, 20 or 25 mm thick, generate a downward movement of the stock when firing, moving it away from the shooter's cheek, and giving incomparable comfort when firing.

> See the full range of Inflex II recoil pads on page 67.

Features and looks are only part of the B725 equation for success. The new B725 feels incredibly balanced in your hands from pad to muzzle. The B725 feels light and swings fast. Put an B725 to the real test by picking one up.

The grip is comfortable, the forearm is compact, narrow and places your front hand closer to the bore line for superior hand eye coordination and pointability.

Scan and discover the B725 revolution

HERITAGE HUNTER 12M

Here is the top of the range in Browning over and under shotguns. The Heritage model is the heir to the B25 side-plated model, and possesses all its elegance. The hunting scene engraving combining partridge and pheasant is remarkably delicate. The stock is made from top quality, carefully oil-rubbed walnut. With its half-pistol stock and its tulip fore-end, the gun pays real tribute to the B25, and is the worthiest of heirs.

HERITAGE HUNTER 20M

Available in 20M calibre, the Heritage Hunter 20M is a model of perfect balance, delicacy and ease of handling. It possesses a half-pistol stock in superb oil-rubbed walnut. Partridge and woodcock are magnificently represented and enhanced on its low, thoroughbred action frame.

The shotgun with the best performance and the greatest reliability.

Shot |

Steel Shot I

When you buy a Browning B525, you are not just buying the heritage and experience of more han 80 years of excellence; you are also buying a shotgun that represents the 5th generation of the legendary B25.

the legendary B25.
The Browning B525 is a more than worthy descendant of this exceptional shotgun and, much like the B25, the Browning B525 has become the benchmark for the industry since its first appearance in 2003.

IMPACT WHEEL EJECTORSFirm, powerful and regular ejection.

B525 HUNTER Light Classic 12M

HINGE PIN

Because of its size, the pin possesses very large contact surfaces – a guarantee of reliability and long life.

CANON BACK-BORED

The 3 benefits of the Back-bored barrel are:

• Less recoil

Hand fitted to create the best there is

The gun moves from one gunsmith to the next to be entirely made by hand, thanks to the expertise acquired over many years by each of the gunsmiths. This is the only shotgun on the market at this price level that is hand fitted during production to such a high performance level, making each shotgun truly unique. Fitting important parts (barrel, action frame, fore-cud and iron) is done by hand using traditional methods (such as red ochre) so as to make the Browning B525 the reference in shotguns. The attention paid to detail when manufacturing and fitting every Browning B525 is unique, just like the "Browning feeling" when the gun locks on closing.

Over and Under Shotguns Light

B525 HUNTER Light

B525 HUNTER Light 12M

The B525 Light Classic constitutes the ultimate synthesis of effectiveness, weight, and styling. An action frame made of a lightweight "Aircraft" grade alloy reinforced with high-strength steel inserts, a light Back-bored barrel profile, and finally a choice of wood and appropriate shaping give this shotgun perfect weight, balance, and feel in the hands.

B525 HUNTER Light Elite 12M The B525 Light line is completed with this Elite model, offering richer and more engraving with gold plating.

The buttstock and forearm are made of grade 3 walnut and then finished with oil.

B525 HUNTER Light 20M & 28 Only 2.7 kg! The B525 Classic Light 20M or 28 gauge is the lightest of the Browning hunting Over and Under hunting guns.

The action frame of light alloy with a steel insert on the side and a careful choice of wood (which is finished with oil) have allowed us to reach such a light weight.

B525 Game 1 12M

The B525 Game 1 is your ideal hunting partner. Very reasonably priced, it is the basic model in Browning over-and-under hunting guns. Its action frame made from a single block of forged steel, its lightweight Back-bored barrels and Invector-Plus chokes make it the ideal gun for all your hunts. It is available with the Auto Safety system.

B525 HUNTER Prestige 12M & 20M

This elegant, refined model has a discreet charm. Its buttstock, made in superb grade 4 oil-finished walnut, has a medallion and sculpted teardrops on each side plate. Its fine engraving, finished entirely by our master engravers, and the very beautiful old silver colour of its action frame make it into an elegant firearm in the best of taste.

B525 HUNTER Elite 12M & 20M

The B525 Hunter Elite combines beauty, lightness, and balance. A completely new engraving of a hunting scene livened with small bouquets decorates this B525. This exquisite engraving covers and adds value to the main working parts. The weight and balance have been completely reviewed and improved thanks to new, lighter barrels.

B525 HUNTER 20M & 28

Reprising the characteristics of the Classic, this B525 sets itself apart with its new engraving and its English grip, which give it a very delicate line.

CYNERGY HUNTER Light Grade 3 12M CYNERGY HUNTER Grade 3 12M This stylised version of the Cynergy Hunter has been created at the famous Italian engraving workshop of Giovanelli. Another unique feature of this shotgun is that the wood is made from a single block of grade 3 American walnut.

A buttstockmade of grade 3 walnut finished in oil, a steel action frame decorated with animal scenes, two ducks taking flight on the right, two partridges on the left, together with a nickeled finish form the Cynergy Hunter's magnificent hunting finery. But the Cynergy's shape, design, and performance are still the same.

CYNERGY HUNTER Grade 3 20M

For lovers of small gauges and guns with elegant lines, the Cynergy Hunter 20 with its steel action frame has been made just for you! With its low action frame height, its tulip fore-end and its classic stock, this shotgun is a real 20 magnum gauge in the body of a 28.

MAXU5

The most reliable design, construction, and performance!

OPTIMAL DIMENSIONS

The drop and the cast can be adjusted by using a set of buttstock spacers.

Browning's new patented loading system sends the first shell directly to the chamber from the magazine.

MAXUS

TECHNOLOGY

The recoil pad with Inflex technology is the most effective of all semi-automatic shotguns.

TRIG/GER The Lightning trigger system

LIGHTNING

The Lightning trigger system is designed to offer a smooth, crisp feel with the minimum of travel.

THE SOFTEST SHOOTING SEMI-AUTOMATIC EVER:

While no recoil reduction system on a shotgun can escape the laws of physics, the Maxus is sure to change your mind about recoil control. The Power Drive Gas System, Inflex technology, Vector Pro Back-bored technology, from Browning are combined to reduce the total recoil force to the shooter by 18% compared to any other semi-automatic shotgun on the market.

The new geometry of the extended Vector Pro forcing cone together with the Back-bored barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

MAXUS PREMIUM Grade 3

SPEED LOCK

The Invector-Plus interchangeable choke functions jointly with the Vector Pro and the Back-bored barrel to offer dense and regular shot patterns.

INFLEX TECHNOLOGY

Much more than a recoil pad in a recoilabsorbing material, it has been designed with an internal structure that lowers the buttstock and pushes it away from the shooter's face after each discharge, which allows a second shot that is even more comfortable and faster.

RAPID UNLOADING

And now, unloading is just as simple with the new Maxus. The fast unloading function quickly and easily clears the tube magazine, without any need to individually chamber shells.

CUT OFF

The Maxus is equipped with a Cut off for the magazine to allow the shooter to unload the chamber easily, and thus change the type of shell without having to chamber a shell from the magazine.

POWER DRIVEN GAS SYSTEM

The Power Drive Gas System uses larger escape valves to remove gas more quickly with heavy loads. A brand new patented design for an integrated valve keeps residue outside the mechanism for cleaner functioning. The piston has a run increased in length by 20% to make it even more reliable with light charges. The system works with loads of 24 to 64q.

SPEED LOCK

This secure system for setting the forearm makes disassembly of the shotgun for cleaning and storage y and faster. You can attach or detach a strap with one simple press too. The patented Turnkey magazine plug system is easily disassembled with a car key.

SMALL

BULLNOH

GAME

MAXU5

The most reliable design, construction, and performance!

MAXUS PREMIUM Grade 3

The Maxus Premium is the top of the-line model in the Maxus family. Its elegant brushed nickeled a very distinct character. receiver is decorated with a fine animal engraving enhanced with gilded birds. The select grade 3 walnut of the stock and forearm have oil-rubbed finish.

MAXUS HUNTER Grade 2

The animal engraving and nickeled receiver of the Maxus Hunter give it This next generation gun enjoys all the innovations of the Maxus line.

The new Maxus from Browning is the most anticipated semiautomatic shotgun in decades.

Several highly innovative technologies combine to make the Maxus deliver up to 18% less recoil, 44% less muzzle jump for more accurate follow-up shots, and a firing system that is 24% faster than the nearest competitor.

A new Back-bored Vector Pro barrel assembly has been developed specially for the Maxus.

Add in other benefits, such as the new Speed Lock Forearm with express locking mechanism and Turnkey Magazine Plug, Browning Maxus is the finest, most reliable semi automatic shotgun ever made.

U

MAXUS SPORTING Carbon Fibre

The latest version of the Maxus range, this gun has been specially designed for sports shooting. With its ventilated rib – tapered from 8 to 6 mm, you can line up your target at top speed. Its carbon finish gives it a particularly unique style.

Maxus Standard

The latest arrival in the Maxus range, the Maxus Standard is a gun with a soberly designed receiver delicately enhanced by grade 2 oil-rubbed walnut elements. Like all the Maxus range, this steel-shot tested gun is supply with a 5 cm barrel extension.

Maxus Composite

The all-terrain version of the Maxus is chambered in super magnum. The buttstock and the forearm of this model have a careful ergonomic design, with all the handling surfaces specially developed for Browning.

MAXUS Standard Super Magnum

This new Maxus has been designed for waterfowl specialists. It is equipped with a super magnum chamber for shooting at very long distances. Like all the Maxus, it is steel shot tested and has a countersunk receiver for fitting a hide scope.

A. VECTORPRO & BACK-BORED VECTORPRO

The new geometry of the extended Vector Pro forcing cone together with the Back-bored barrel eliminates the deformation of shot, making it possible to improve the shot pattern and reduce recoil sensation.

B. BARRELS

The principle of the Back-bored barrel is to increase the diameter of the barrel's bore by a standard value, from 18.4 to 18.8 mm. Increasing the barrel bore diameter offers three benefits:

1. INCREASED SPEED AND PENETRATION

Thanks to the "Back-bored" technology there is less friction between the shot load and the walls of the barrel. Instead of needing to overcome friction, powder combustion gasses can devote more energy to propelling the cartridge wad, which results in higher load speed and greater shot penetration. This also applies to greased wads.

2. BETTER SHOT PATTERNS

With less friction on the barrel walls, the amount of shot not deformed on firing is greater, which enables it to keep its ballistic qualities. As ballistic qualities are conserved, you will obtain exceptionally regular impacts with much more shot that effectively hits your target.

3. LESS RECOIL

In a Back-bored barrel, the shot load travels through more easily and, for this reason, the shooter feels less recoil. Our Research and Development department has measured a reduction in recoil of 6%.

C.CHOKES INVECTOR DS INVECTOR DS

Adjustable Invector-Plus and Invector DS chokes have been specially developed by our Research and Development Department for our Back-bored barrel system. They have been designed to obtain "a perfect target" at different shooting distances.

1. THE PERFECT TARGET

Our objective is:

- Shot pattern efficiency of 80% on target, i.e. 80% of the shot contained in the cartridge must be in a target area inside a diameter of 75 cm.
- A perfect shot pattern: the shot pattern must be such that there is a minimum number of "empty" areas, i.e. areas in the target surface where there are no shot impacts.

2. AT DIFFERENT SHOOTING DISTANCES

Our objective is:

• To obtain the perfect target at different shooting distances. Depending on the type of choke used, the efficient shooting distance will be different. For example, at 15 m, with an Invector-Plus Cylindrical choke, we obtain target shot pattern efficiency of 80% with a minimum number of surfaces without any shot impacts.

THE PERFECT TARGET

Browning offers a perfect balance between a shot-pattern efficiency of 80% and a perfect shot-pattern with an exceptionally even spread of pellets.

One competitor's gun alone offers good shot-pattern efficiency, but the pattern itself is much less efficient due to the numerous empty zones in the target area.

TESTS AGAINST COMPETITION

In its permanent concern for improvement, Browning regularly tests its own products by comparing them with other guns on the market.

Our tests show that the chokes on other guns provide good performances but their shot pattern is by no means perfect and therefore lead-shot tiering is not as perfect as with Browning.

With large numbers of competitors, it is difficult to find any difference between 1/2, 3/4 and Full choke performances (efficiency and shot distribution).

*test carried out with Winchester AA n°7 lead shot cartridges.

THE BROWNING CHOKE RECOMMENDED FOR DIFFERENT SHOOTING DISTANCES

Full Choke	= 35 m	Depending on the Browning
3/4 Choke	= 30 m	choke you use, you can adapt
1/2 Choke	= 25 m	your gun perfectly for the
1/4 Choke	= 20 m	distances at which you shoot and
Cyl	= 15 m	the game you are hunting.

See the full range of Invector DS and Invector-Plus chokes on page 87.

BAR

The most reliable rifle on the market

46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

ADJUSTABLE BUTTSTOCK

The BAR Short/LongTrac, as well as certain BAR Zenith are fitted with an interchangeable butt plate which enables you to adjust the length of your gun depending on your morphology.

REVERSIBLE SAFETY CATCH

Every BAR Short/LongTrac or Zenith rifle possesses a reversible safety catch that can be adapted for left-handed shooters.

AN UNDISPUTED LEADER WITH 46 YEARS EXPERIENCE, BROWNING IS THE SPECIALIST IN SEMI-AUTOMATIC RIFLES.

It owes this title to the quality of its mechanism, the smoothness of its gas-assisted operation which reduces recoil sensations to a minimum and its reliability, but above all to the fact that it has constantly evolved for offering you consistently better performance.

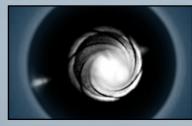

RELIABILITY46 years of experience combine with the simplicity of its system, the precision of its manufacture and the quality of its controls.

Excelente Precisión 7-lug rotating bolt

FN HERSTAL BARREL
The barrel of each BAR rifle is created by cold hammering at the Fabrique Nationale in Herstal, Belgium.

INTERCHANGEABLE BUTT-PLATE
The BAR Short/Longtrac and
the Zenith inserts are fitted with
interchangeable anti-recoil butt
plates. Depending on the model
of gun, Inflex II and Classic butt
plates of different thicknesses are
available: 1.3 cm, 2.0 cm
and 2.5 cm. These butt plates
enable you to adjust the length of

your stock without any difficulty.

BAR ZENITH

Semi-automatic Rifles

BAR ZENITH Wood Hand Cocking

The best-selling semi-automatic rifle in the world.

Hand Cocking System

THE BAR ZENITH PRESTIGE WOOD NOW HAS A NEW MANUAL COCKING SYSTEM.

THE MANUAL COCKING SYSTEM LETS YOU LITERALLY COCK YOUR RIFLE, BY MOVING THE ARMING PLUNGER FORWARDS, WHICH PUTS THE HAMMER SPRINGS UNDER LOAD.

YOUR GUN IS NOW READY TO FIRE.

When hunting and at your firing station, you can feed a cartridge into the chamber of your gun and then use the manual cocking system for putting the cocking plunger in the "uncocked" position. Your rifle is now safe.
When you want to fire, you just have to push the plunger forwards. Your rifle is now ready and all that you still need to do is to squeeze

the trigger.

You can just as easily uncock your gun by pressing on the cocking pushbutton on the top of the plunger. This removes the load from the hammer springs and makes your gun inoffensive, and therefore safe.

It is a very simple easy-to-use system that gives your rifle an extra degree of safety.

- Cocking plunger in the "uncocked" or safety position.
- Cocking plunger in the "cocked" position, a red dot appears. Your gun is ready for firing.
- 3 Uncock your BAR Zenith by pressing the pushbutton downwards.

BAR ZENITH Wood HC

The BAR Zenith Wood HC possesses a longer piped barrel that offers a more accurate line of sight. The new manual cocking system located on the top of the pistol grip offers an extra degree of safety.

BAR ZENITH

The master values of this Zenith family are style, refinement, and elegance, as well as the pleasure of using a custom gun.

Indeed, the major asset of the BAR Zenith is that it gives you the possibility of customising your gun thanks to an array of available options with different plates integrated into the receiver, but above all, several types of buttstocks and forearms.

X-BOLT HUNTER with sighting system Right-hander - left-hander

This version is characterised by the battue rib type sighting system and optic fibre front sight allowing for rapid firing without a scope at short distances. This is ideal for driven hunts and is very versatile in use. Moreover, a "hide" type rear sight is delivered with your gun. The very you cross difficult terrain with the modern designed and perfectly ergonomic forearm of the X-Bolt is made of walnut.

Available in a left-handed version calibres 308 Win , 30-06, 270 WSM, 300 WM

BLR Lightweight

BLR. This lever-action gun is at home everywhere. On rifle ranges, in the hide, or when tracking where its lever action plays a reassuring role as

gun slung or on your shoulder.

Here is the classic version of the

BLR Lightweight Battue

The BLR is the only lever-action rifle developed in magnum calibre. Its mechanics are impeccable and characterised by the exceptional smoothness of its operation. It has a removable magazine and a highquality barrel and is ready for fitting a scope. Its battue rib along with a short barrel makes an excellent weapon for driven hunts and tracking.

BLR Lightweight Take Down

The BLR now exists in a Take Down version, i.e., it can be dismantled, for example, to facilitate its transport on hunting trips.

No tools are required for dismantling, which is a quick and easy operation that never affects the accuracy of your gun.

BROWNING REINVENTS THE DOUBLE EXPRESS RIFLE

The barrel assembly, the essential part of this gun, is both classical and innovative. A spacer ring placed on the upper barrel ensures the precision of the vertical convergence of the barrels, while the lateral convergence is ensured by the design of the barrel itself, which incorporates a unique "cradle" strip.

Whenever, a choice of ammunition is made, a spacer ring is recommended and placed in a fool-proof position below the foresight on the top barrel, which guarantees the convergence of impacts coming from both barrels.

Please note this operation must be performed by your gunsmith.

Bolt Action Rifles	58-65
X-Bolt	58-63
EuroBolt	64
A-Bolt	64
Semi automatic Rifles	65
BAR Acier	65
Mounts & Accessories	66-67

The Browning appeared like a

revolution in the bolt action rifle universe. The X-Bolt was built on

the foundations of the success of previous Browning rifles, carrying numerous innovations that will without doubt make it one of the best rifles on the market.

The benchmark for Bolt Action Rifles

BOLT-UNLOCKING BUTTON

Once the rifle has been loaded and is in the safety position, this button enables the gun to be unlocked for removing the cartridge from the chamber, whilst staying in a safety position at the same time.

This extra-soft pad offers the best recoil absorption possible on a rifle.

FEATHER TRIGGER

The new adjustable three-lever Feather Trigger™ system of the X-Bolt allows a rapid and clean action from the trigger show, with perfect accuracy and no overtravel.

FEATHERTRIGGER"

ROTATING MAGAZINE

Made in light ultra-resistant polymer, it gives exclusive protection to bullet noses.

AN EXTREMELY ACCURATE BARREL

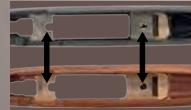

Every barrel is checked three times for providing exceptional quality and accuracy.

INFLEX ANTI-RECOIL BUTT PLATE

The Inflex Technology anti-recoil pad is standard on every X-Bolt rifle. This extra-soft pad offers the best recoil absorption possible on a rifle. The exclusive design and material used promote a downward deviation of the direction of the recoil forces, thus pulling the buttstock slightly away from your face in order to reduce the recoil and upward motion of the gun.

UTMOST ACCURACY

A free-floating barrel is essential for utmost accuracy.

The X-Bolt's free-floating barrel is perfect due to double bedding i.e. positioning of the barrel/breech block assembly at two points with respect to the forearm, at the front and at the rear.

X-LOCK MOUNTING SYSTEM

has 4 screws per fixing point. Therefore it is more stable and provides higher accuracy.

BOLT-UNLOCKING BUTTON

The X-Lock scope-mounting system The bolt-unlocking button works in conjunction with the safety to provide an added degree of safety.

BAR STEEL Affût Boss™

The addition of the BOSS™ system produces two particularly interesting effects: recoil reduction (in the range of 30 to 50%) and increased accuracy.

The performance of the BAR is thus improved when shooting using a scope or at long distances.

BAR STEEL Affût

This version is fitted with a vertically and horizontally adjustable rear sight. The fine metal front sight ensures perfect accuracy of aim.

EXCLUSIVE BROWNING BOSS™

(Ballistic Optimizing Shooting System): improvement of accuracy.

The BOSS™ system has two main advantages: Improvement of accuracy: the BOSS™ system allows the bullet to leave the barrel at the ideal moment, i.e., at the "peak" or "valley" of the vibration wave when the muzzle is virtually motionless.

Recoil reduction: air vents located all around the circumference of the BOSS™ system serve as a muzzle brake by diverting the combustion gas. The result is a recoil reduction of around 30-50% depending on the calibre and, therefore, excellent shooting comfort.

"LEGENDARY RELIABILITY"
AND "INNOVATION" ARE THE
B725'S WATCHWORDS.
The new Browning B725 is an

aesthetic and technical revolution in Over and Under shotguns.

Based on the legendary B25, it is innovative whilst retaining the many existing design features of the B525, which make it the most outstanding Over & Under shotgun on the market.

The legendary strength is now combined with revolutionary design and features

New Inflex II butt plate

New high-performance mechanical trigger system

B725

The legendary strength is now combined with revolutionary design and features

Low action frame

The new B725 has a low action frame, which combines all the qualities of reliability and long-life possessed by all Browning Over and Under shotguns. The action frame has a lower and more compact profile than most other Over and Under shotguns.

The low action frame provides the following benefits when shooting by:

- Enabling faster aiming and therefore more instinctive shooting. Reducing muzzle flip due to the frames inline recoil providing a more comfortable shooting position, making it highly manoeuvrable and effective when shooting.
- The B725 is the only Over and Under gun that combines the reliability and legendary sturdiness of Browning Over and Under guns, thanks to its wide, flat bolt, a unique hinge pin and wide recoil surfaces, all combined with a low action frame.

UNIQUE TO BROWNING

INVECTOR DSTM

Invector DS chokes

The new Invector DS chokes provide unrivalled performance by providing an optimal length of 80mm, an exclusive internal shape and a patented gas seal segment.

The optimal 80 mm length enables an exclusive internal shape to be developed, which optimises performances over all shooting distances and ensures a uniform concentration of the shot pattern when using lead or steel shot.

The new patented Invector DS (Double Seal) Chokes offer a double seal. They are fitted with a compression ring that limits penetration of combustion gas between the choke and barrel. The thread on the muzzle side forms an obstacle to prevent exhaust gasses from entering. The ring stops the Invector DS from unscrewing when firing. This guarantees that the choke stays clean and is easy to remove under any conditions.

See the full range of Invector DS chokes on page 87.

Extensive shooting of 500 rounds

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

INVECTORDS™ COMPETITOR'S CHOKE

Discover the Hunter version of the B725 on page 18

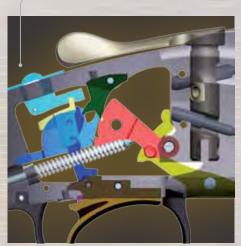

• Canon Back-bored | Vector Pro

The B725 has new barrels made of new Back-bored Vector Pro shaped barrels and Invector DS chokes. This gives the B725 perfect balance, ergonomics and swing in all shooting conditions.

- Increased speed and better penetration of shot by reducing friction between the shot and the walls of the barrel
- Better shot pattern by reducing any pellet deformation when going from through the forcing cone between the chamber and the barrel bore.
- Recoil is reduced because the shot load moves more freely.

Mechanical firing

The B725 has an improved mechanical firing system, allowing the shooter to really "feel" the shot as the trigger is pulled, which makes for a great feel.

These new firing system is shorter, faster and lighter giving more control over your shooting.

Browning's innovative mechanical firing system provides great ease of use for hunters and shooters, guaranteeing that a second shot can be fired whatever the circumstance.

Even if you only have one cartridge in your gun, you will still be able to fire, which is not the case with an inertial system.

Inflex II recoil pad

A totally new Inflex II recoil pad is fitted on all B725 shotguns as standard.

This ultra flexible recoil pad provides the best recoil absorption possible on a shotgun.

This exclusive material makes shouldering easier. Two other pads, 20 or 25 mm thick (available on option), make it easy to adjust the length of your stock. In this way, you can adapt your B725 to your own morphology and also adapt it depending on the hunting season.

Furthermore, these exclusively designed pads, 20 or 25 mm thick, generate a downward movement of the stock when firing, moving it away from the shooter's cheek, and giving incomparable comfort when firing.

See the full range of Inflex II recoil pads on page 67.

Features and looks are only part of the B725 equation for success. The new B725 feels incredibly balanced in your hands from pad to muzzle. The B725 feels light and swings fast. Put an B725 to the real test by picking one up.

The grip is comfortable, the forearm is compact, narrow and places your front hand closer to the bore line for superior hand eye coordination and pointability.

ULTRAXS Prestige 12M

The Ultra XS Prestige is the specialist in Sporting Clays.

Equipped with a Back-bored barrel assembly, the top rib is mounted on a rounded base in order to allow for the free expansion of the barrels when their temperature is increased.

ULTRAXS Prestige 20M

This version of the Ultra XS 20M is fitted with superb oil finished walnut, a new engraving with gold inlay and exclusive 100% titanium chokes.

ULTRA XS 20M

Fine and distinguished, this 20M calibre Ultra XS is extraordinarily effective.

Its quick and precise swing, combined with Back-bored barrels equipped with Midas chokes, offers exceptional performance. ULTRA XS 12

Sporting clays, a gruelling and technique-oriented discipline, can take on very different forms. Parcours in open fields, in undergrowth, and the majority approaching and retreating clay.

The Ultra XS allows you to modify the necessary parameters in a few seconds. The XS Sporter version is equipped with external Midas chokes.

ULTRA XT High Rib

This Ultra XT has a high top rib. The pillared rib enables you to fire in a more natural position, the adjustable cheek-piece offers millimetric stock adjustment for accurate sighting.

ULTRA XTR 12

This model is fitted with a rubber comb that is simultaneously both smooth to the touch and non-slip. This gun strives for accuracy in aiming that can be guaranteed to the millimetre with a comfort that, until now, had never been attained. It is primarily geared toward shooters who practice their sport intensely.

ULTRA XSH 12

Oriented toward pit shooters seeking good interdisciplinary versatility (pit, double trap, etc.) and Helice (ZZ), this ultra XSH is equipped with removable Midas chokes and 74 and 76cm barrels.

ULTRA XTR Prestige 12

As its name would indicate, this Prestige version of the XTR shotgun sets itself apart with the superior quality of its wood and its 5 100% Titanium Invector+.

Its completely reworked engraving

Its completely reworked engraving features silver inlay.

Grand Prix, the first Browning shotgun with disconnectable ejectors

The Sporter and Trap GP shotguns are equipped with the "Ejection Control" system that, after a simple operation, allows you to switch between ejection and extraction modes.

The Back-bored barrels are fitted with Invector Plus Midas chokes made by Briley, the renowned manufacturer.

GRAND PRIX Trap

Following the Sporter version, the line of GP shotguns with disconnectable ejector is now available in a Trap version.

GRAND PRIX Sporter

The GP Sporter lends itself to competition shooting, with an approximate pull weight of 1.8 kg and a Back-bored barrel equipped with Midas chokes.

This is an attractive gun with a modern, sporty engraving that incorporates both gold and silver into its design.

HERITAGE SPORTER 12M

HERITAGE The highest-performing **SPORTER** and most reliable shotgun

HERITAGE SPORTER 12M

The Heritage Sporter combines the performance of a modern shotgun with the elegance of a true deluxe gun. It embodies the line of the hunting model with its magnificent side plates, but with the specifications of the Sporter versions. The pistol buttstock and truit forces are are made from and tulip forearm are made from beautiful, oil-finished walnut. Each gun is beautifully engraved.

B525 Sporter Prestige 12M & 20M

Elegant and refined, the B525 Sporter Prestige is fitted with grade 4 oil-finished walnut, "water droplets" on each side plate, and a chequered binding. The buttstock is also equipped with a metal plate on which you can have your initials engraved. This fine inscription, performed entirely by our master engravers, covers nearly the entirety of the pieces. **B525 SPORTER** Elite 12M

Lovely grade 3 oil-finished walnut combined with a beautiful hand-retouched engraving of a hunting scene make the B525 Sporter Elite an elegant sporting gun of high performance.

B525 Sporter 20M

The B525 Sporter is the base version of the 525 series. A grade 1 pistol buttstock and 5 Invector chokes make this an ideal sporting gun.

B525 Sporter Premium Gold 12M

The Premium Gold enjoys the same specifications as the Sporter, which include grade 2.5 wood and 5 Briley chokes. However, it asserts its own identity with its black action frame decorated with golden birds.

B525 SPORTER 1 NEW

The B525 Sporter 1 is the basic model in Browning over-and-under guns. Equipped with 10 mm top rib, ventilated side-ribs, a pistol grip and a tulip fore-end, the B525 Classic Shooter is just as much at ease when out hunting as for shooting sporting clays. Very reasonably priced, it is the ideal gun for beginners - both hunters and sporting clay shooters.

GTS Elite 12M

GTS Special 12M

With its superb engraving, this version of the GTS exudes both distinction and elegance. The engraving, which features the distinctive GTS design – a duck that gradually transforms into a clay target, is enhanced by a lovely arabesque motif and superb oil-finished European walnut.

Its Back-bored barrel, 10 mm rib, and ability to fire any cartridge (including Steel shot) make for a formidably effective gun without sacrificing comfort, ideal for hunting waterfowl and migratory birds.

INVECTORDS COMPETITOR'S CHOKE

After extensive shooting of 500 rounds of the dirtiest loads, competitor's choke tube that don't have a gas seal show significant grit and residue buildup on the tube.

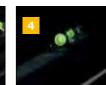

The innovative gas seal on Browning Invector-DS tubes keeps the choke tube cleaner, for easier removal and installation.

Shotgun Sights

HIVIZ® MAGNI-OPTIC Solves reverse master eye problems and lets you shoot with both eyes open. Screw-mounting (supplied with screws of different diameter)

HIVIZ® MAGNI-SPORT Solves reverse master eye problems and lets you shoot with both eyes open. Magnetic mounting (supplied with two bases of different width)

It enables you to mix all types of and the fact that the rifle can be dismantled make it an exceptional cartridges (long, long rifles, short) with no risks of jamming.

Hand Guns

On the 100th birthday of the legendary 1911 pistol, we are proud and happy to present you with a re-dimensioned version of this

1911-.22 LR

The Model 1911 pistol was created by John Moses Browning at the beginning of the 1900's to reply to a call for tenders made by the American army for a .45 calibre pistol.

Barrel Calibre Rear sight Front sight Handle Material Magazine Total weight Finishing

11 cm .22 LR fixed fixed fixed brown composite plastique 10 rounds 0.43 kg black

The pistol then became the most widespread and most popular handgun.

This new resized version respects the proportions and functionalities of its ancestor perfectly, whilst offering a more compact gun with an exceptionally low weight, barely 430 grams.

The slide is machined in a single aluminium block, the side grooves make it extremely easy to hold and handle, and fluid and easy to use. It has a black mat finish.

The aluminium receiver also has a mat black finish. The barrel, made from molybdenum chrome steel has a barrel insert machined from a single stainless steel block.

The magazine with a capacity of ten rounds is in heat treated steel to guarantee long service life and reliability of loading.

The manual safety catch is well-dimensioned. Like the original model, the 1911-.22 has a pistol grip safety system.

Buckmark .22 **Hand Guns**

Browning Buck Mark rim-fire pistols are very highly valued due to their quality, reliability and accuracy. These pistols have a receiver made from a single aluminium block machined using numerical control. The barrel is machined in a single top-quality steel block and the chamber is hand-bored for guaranteeing optimal accuracy. Every Buck Mark pistol has fully adjustable sights.

Breaks are light accurate and crisp. Grips, URX version in rubber or UDX in wood are perfectly ergonomic. Your hand positions itself systematically in the same place on the grip every time you fire. This allows more instinctive firing and improves accuracy.

GP

Hand Guns

The GP exists in the Silver Chrome version, which is equipped with a rear sight that is adjustable in elevation and direction and a sport front sight with a rounded base plate.

The slide and the receiver are nickeled, and the rubber grip is made by Pachmayr, for sure and efficient handling.

It brings together all of the qualities found in the GP, yet with an additional ambidextrous safety and lighter weight (910g), which make it an accurate gun with practical handling. The "Pachmayr" handles ensure the best handling.

It is made with a swivel system.

Adjustable **GP** Practical

The GP Practical meets the demands of Practical Shooting. It has undergone several improvements, such as:

- Adjustable, low profile sights.
- Particularly crisp trigger pull.
- Extremely comfortable handling due to its Pachmayr chequered rubber grips.

Clothing Care

Absorbs odours

Traditional washing products are always perfumed and inform game that you are close-by.

Browning 3 in 1 treatment is not only perfume-free but it also contains odour-absorbing molecules and masking agents to make you "invisible" to game's sense of smell. The advantage of the Browning anti-odour system is that it can be used on all your hunting clothes and will avoid you having to invest in costly clothing that is less effective over time.

Best results are obtained by combining 3 in 1 waterproofing treatment with the 3 in 1 washing product.

Ideal for your HUNTING gear or clothing

Absorbs UVs

treatment reduces the **UV** radiation reflected by your clothing.

Best results are obtained by combining

Browning products a traditional washing product

3 in 1 waterproofing treatment with the 3 in 1 washing product.

3 IN 1 WATER-PROOFING SPRAY FOR HUNTING WEAR

Water-repellent treatments applied to the outside of fabric tend to lose their efficiency as time goes by (washing, rain, rubbing, etc.). Therefore, they need to be retreated regularly with a waterproofing product that does not damage the inner membrane and allows the fabric to breathe correctly.

129893

3 IN 1 WASHING PRODUCT FOR HUNTING WEAR

Cleans without damaging technical clothing

The micropores on waterproof breathable membranes get blocked as time goes by (dust, dirt, etc.), which reduces their capacity to evacuate moisture into the open air. Regular washing with a specialized product that respects membranes' characteristics quarantees the long life and effectiveness of your technical clothing. Browning treatment will also wash your normal clothes wear perfectly well.

129894

Browning treatments are environment friendly and OEKO-TEX® Standard 100 certified.

Cleaning and Maintenance

LEGIA SPRAY: cleaning oil for barrels and housings: excellent product for maintenance and protection.

With our pumping system (without propellant gas, 200ml) and the adhering qualities of our oils (low volatility) the performance of the LEGIA SPRAY has 25% more active ingredients than other shotguns.

This top-quality kit is ideal for rifles and shotguns, calibres .30 to .22 and from calibre 12 to .410, as well as for pistols, calibre .357, .40 and .45

This 32 pieces kit includes two cleaning brushes, five wollmops, two solid brass adaptors, two slotted ends, and 50 cleaning cloths

The Reactar™ G2 anti-recoil patch uses the new flexible Impact Geltm material, which absorbs recoil better than any other product on the market

> The Reactar™ G2 patch is placed inside jackets, vests or shirts fitted with a special Reactar[™] pocket

Only 8mm thick, it does not change your length of arming or point of aim. Flexible it adapts itself to your morphology without the slightest difficulty

A means for protecting both firearms and accessories. The soft imitation felt fabric does not damage firearms and includes a Zorb Tech™ waterproof top. Zorb Tech™ keeps spills from spreading and cleansing agents from soaking through. This mat is also washable, dryable, and treated to be stain resistant

www.browningPartnerLodges.com

The Browning B525 is already appreciated by more than a million hunters for its many qualities, and most especially for its unequalled sturdiness in the field. In collaboration with the brand "Magic Safari Lodges" and the hunters' travel agency "Orchape", some "small game" destinations are suggested in Argentina. Burkina Faso, Kazakhstan, Chad, and Spain. These are now "browning Partner Lodges". Several B525 shotguns are made available to hunters at each location. This free service that offers the opportunity to hunt with a legendary shotgun will also allow you to avoid the problems and possible hazards of travelling by air with a gun.

MAGICSAFARILODGES.COM

"Magic Safari Lodges" is the premier guide to exceptional hunting destinations specially conceived for those looking for better experiences, blending deluxe facilities with unforgettable locations. www.magicsafarilodges.com

A unique sporting challenge awaits you!

LES COLVERTS DE SABOURNAC - France

Unique in Europe, Sabournac is a private hunting estate that has been organising mallard shoots over the last twenty years or so on the principles of the large "English style shoots". This type of hunting surprises and appeals to many hunters, who like shooting a few hundred cartridges on high-flying mallards. The birds fly over surprisingly high, which challenges top-shooters to equip themselves with full-choke guns. The estate is open from September 1st to January 31st and may be reserved by a single group of 4 to 12 guns.

CAMPEMENT DE L'ELÉPHANT - Burkina Faso

Hunting francolin and guinea-fowl at random is the speciality of the Elephant Camp together with "pass shooting" turtle-dove and sand-grouse coming in to drink at waterholes. The season goes from December through to March. Hunters will find a comfortable camp (with air-conditioning and a swimming pool). Enjoy all the unfamiliar sights and sounds of the African bush.

SOTO REAL

The EagleMP camp is a reference in duck-shooting in San Javier, located in the province of Santa Fé. This is considered to be one of the most reputed regions in the world for duck-shooting. EagleMP has been managed by Frenchmen for the last 20 years. The season goes from February through to July with a change in biotopes: from paddy fields to marshes passing by the Parana islands. Turtledoves can also be hunted with over 1,000 cartridges fired per day.

CORTIJO SOTO REAL - Spain

A unique sporting challenge awaits you at Soto Real. An authentic five-star hunting lodge set among the palm trees, bougainvillea, and orange trees of a working estate in the rolling hills of Andalusia. Driven red-legged partridges are hunted from October until March and walked-up quail from July to September. You can truly expect a challenge above and beyond the usual at Soto Real.

GREAT SPANISH HUNT - Madrid, Spain

La Fnca and Fuensauco estates, run by Javier Corsini who is one of the most respected shoot owners in Spain with his 30 years of experience. His professionalism, his rigour and his expertise are a guarantee that you will have a magnificent stay with a booty of between 500 and 2,000 birds, depending on the size of the party. Surrounded by an estate of 3,000 hectares, a luxury hunting lodge is ready to welcome you, with its gastronomic creations and top-quality Spanish wines that will really make your stay unforgettable.

KOULOUDIA - Lake Tchad, Tchad

EAGLEMP - Argentina

The new KOULOUDIA air-conditioned camp, 3 hours away from N'Djamena offers exceptional hunting for teal, pintail, shovelers and African duck coming from Europe for the winter. The season goes from November through to March in the Lake Chad overflow areas, which are cultivated by villagers and where duck come and eat.

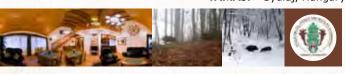

PUELO EXPEDITION - Cordoba, Argentina

Cordoba is considered the dove shooting capital of the world. Over 50 million doves annually inhabit the 60-mile radius (95 km) around Puelo Expedition's lodge. Doves offer fast and challenging shooting with a high number of cartridge shot in one day, from 1000 to 3000 cartridges a day is possible. Puelo Expedition runs 2 different lodges with the high quality standard to offer the best service to hunters. Puelo Expedition runs a lodge in the Buenos Aires province for those who want to combine dove hunting with duck Hunting.

TAMASI - Gyulaj, Hungary

Gyulaj is a territory belonging to the Hungarian water and forestry authorities, which offers exclusive big wild boar battues hunts or shoots in open or closed territory. The size of the estates (900 ha and more) maintains the quality of the hunt and offers everyone the possibility of taking shooting a large number of young boar or big tusked males. A guard accompanies every person at his post during the 3 or 4 beats of the day, which can be organised over a whole weekend. A torchlight presentation of the bag is made to the best Hungarian traditions at the end of the day's shoot, before returning to the very comfortable hunting lodge.
